Bones (Step-Into-Reading, Step 2)

Synopsis

How many bones are there in the human body? Which bone is the longest? Or the smallest? Without bones, you would be a blob, like a jellyfish or a worm. Our bones support us and protect our insides. They work together with our muscles to allow us to do all the things we do! So when you think of your bones, say "Thank you!" This simple Step 2 introduction teaches young readers these facts and many more about the skeleton inside each of us!

Valley Forge, illustrated by Greg Harlin. He lives in Lexington, Massachusetts with his wife, Joan.

My girl is in kindergarten and she loves science, so I got her this book as a filler to get to the "free shipping" amount on an order. She absolutely loved it! It is interesting, with lots of facts about the human body and bones specifically, written in an age appropriate way.

I ordered the Bones book for our granddaughter, who is going to first grade in August. She loves to read and enjoyed reading Bones as soon as she got it.

My 3 1/2 year old daughter is really into bones and is always asking questions about bones. This book is perfect for her to learn about bones.

My grandchildren loves this book!

These are great books for children learning to read and for children who don't like to read "long: books. Also these books have a ton of information in them that keep my children interested on reading to the next page. I find that my children will read these books over and over again.

Great story to read aloud to Kindergarten students or for older kids to read to you!

Great book for my reading 5 year old.
