Who Was Thomas Alva Edison? (Who Was?)

Synopsis

One day in 1882, Thomas Edison flipped a switch that lit up lower Manhattan with incandescent light and changed the way people live ever after. The electric light bulb was only one of thousands of Edison's inventions, which include the phonograph and the kinoscope, an early precursor to the movie camera. As a boy, observing a robin catch a worm and then take flight, he fed a playmate a mixture of worms and water to see if she could fly! Here's an accessible, appealing biography with 100 black-and-white illustrations.

Customer Reviews

I bought these for my third grade classroom. They are great for the biography genre and then to use for report writing. The three years I've used them so far the kids LOVED them. Easy for their reading levels, informative, and people they have heard of in their lives. They would read their own and then read other that they had heard of. Could have left these books out 1/2 year and they would have still been reading them.

These are great books. All of the Who Was books are excellent for young readers. My daughter gets very excited when she can teach us a little something about history and she seems to truly find things interesting. I think this is a great read for grades 3 and 4

Purchase these for my grandsons. Great Books, just the right size both in content, and physical size to hold beginning readers interest . Well written for children.

excellent

All the Who am I books are great!

Daughter loves the book, nice addition to the "Who Was" series

I love this series. Perfect for any homeschool library.

I am happy with my purchase
