National Geographic Family Reference Atlas Of The World, Fourth Edition: Indispensable Information And More Than 1,000 Maps And Illustrations

Synopsis

Maps have been around in some form or other since humans first understood the need to record their physical space, and for the past hundred years, the National Geographic Society has been at the forefront of mapmaking. This Fourth Edition of our popular Family Reference Atlas of the World brings you the world and its marvels through maps. Using the latest technological advances, satellite data has been compiled to create some 1,400 images maps, diagrams, graphs, and tables, as well as National Geographic's signature color photographs to allow you to examine the most remote corners of the globe. In an era when political, health, climatic, and environmental crises anywhere on the globe can affect our daily lives, maps provide a time-honored way to navigate the realities we face. With this atlas, you hold a powerful yet accessible tool to understanding the interplay of global forces at work in the fast-changing but always miraculous planet that is our home.

Customer Reviews

NATIONAL GEOGRAPHIC cartographers bring a century of mapmaking experience and cutting-edge technology to bear on every atlas product. Over the last decade, techniques used in digital mapping have undergone remarkable changes. Today, satellite and digital imaging technology, GPS, and GIS technologies provide cartographers with new, dynamic tools to map and animate Earth. Leveraging these emerging technologies to build smart, well-designed, functional, informative atlases is one of the great strengths of National Geographic.

I was pleasantly surprised at the books contents. Very informative. I am very satisfied, and happy about my choice of the atlas. I can recommend it to anyone as a must have library item.

This atlas has a lot of interesting information. I would have loved one of the expensive ones, but that wasn't a good option at the time I bought it. I keep it in the den next to my recliner because I use it when reading about a place or watching TV shows set in different places. It isn't too big or too small.

Beautiful book. Excellent resource for middle school age and up.

Filled with information. Got this for my husband for Christmas and he loved it! You can spend hours learning and enjoying with tons of text and full color photographs and maps!

A gift for my son and his family. Very complete maps, history, the world, the solar system, the universe.

My son loves it being that geography is his thing right now. He is five and has learned his planets, states and capitals and currently working on the countries of the seven continents. We are very happy with our purchase.

We love this Atlas! Big bright pages with lots of different kinds of maps for the same regions/states/countries, etc. The text is written for older children and adults but the maps, pictures, and graphics will keep even younger children entertained.

I have this book and love it for refererce.This book purchased is a gift for Christmas, and hopefully my teenagerfriend will like it as much as I do
