Customer Reviews

Just outstanding, everything I expected and more. I am 69 years old, overweight and out of shape. Dr. Life has inspired me to join a gym and I've started working out five days a week for the past three weeks. Most books explain how to do upper body, day of rest, lower body, day of rest, and then back to upper body. This book divides the work out into five parts instead; chest, back, legs, shoulders, and arms. One body part for each of the five days of the week. Each trip to the gym takes less time as you are only exercising the single body part with four different exercises and four sets per. The diet info is valuable also and I am losing weight at over two pounds per week. Highly recommend.

Good workout plan and I'm sure the diet guidelines are good also, although I think both would be too hardcore for most users. Hormone replacement suggestions also sound too expensive for most readers and it is suggested that the hormone supplementation is required for results for older people.

Life changing book. I bought his first book also, " The Life Plan". I always was in OK shape for my age, soon will be 60. I thought I should take it easy when getting older. His books change completely my diet, exercise intensity. I lost already 8 pounds in 2 weeks. I suggest to start from his first book " The Life Plan". Good Luck!

I have several Dr Life's books. They are great for me to review each year to stay focused and on track.

Book deals w/ Age Related Hormone Depletion. Dr Life says Optimal Nutrition, replacing HGH, Testosterone, & Thyroid Hormones, Restores overall Health, Reduces ED, enhances Weight Loss,

Vitality, Mental Sharpness. Dr. Life is living proof of his claims. I have studied Health & Nutrition over 40 years, as a Health enthusiast, and I say that Dr Life is Right on the money. I highly recommend this Book.

This is a great book for older men like my self who wish to get back to a better presence in life. It is very informative especially about vitamins, exercise and eating habits. I would recommend this to any man that wants to change their life.

I am about the age when Dr. Life started his transformation journey, and I have found this book just right for me, full of wisdom how to manage my body, beginning from how to understand it and how to deal with it's issues, and not blaming getting old. Mentioning issues, I had a couple demonstrated by very bad autoimmune responses for over a couple years, over the time I have found that strengthening the body by vigorous weight exercises and diet, made the issues to go away! At some point we may think about hormonal enhancements, however this is up to the individuals, I hope following the book's regime I will be able to maintain my health without them. Though, I have always been wondering what is the difference between HRT for women which has been used for years, and this what Dr. Life is talking about for men? I am following a routine to attend the gym three times a week, doing weights, I also jog in the other days, and feeling always greater after that. I am battling to get the diet right, but every time I go back to the book, I am back on the right track. Dr Life's book is a great guide to keep young and fit, and remain healthy and independent for a very long time. Thank you!

The book explains in very understandable detail how to change your life style through proper dieting and exercise! A must read to a happier, healthy "You"!! I'll be reading specific chapters over and over again to draw on the full benefits of his plan!
