Diy Aquaponics Design: An Introductory Guide

Synopsis

Before You Build Your Aquaponic Farm: Read this 146 page book (with 156 footnotes) and learn about diy aquaponics from someone who's been involved with commercial aquaponics since 2010. This book breaks down all the key concepts needed to build a real diy aquaponics farm and focuses a lot on indoor farming: -backyards -basements -apartments -garages With a good design, you'll be able to grow as much food as you want without the headaches people typically associate with aquaponics. Join me on a journey through aquaponics from the perspective of someone who's spent 10,000 hours commercializing it. This book is a part a larger community focused on helping people design the right aquaponics farm for their needs. Please visit www.diyaquaponicsdesign.info to learn more and get great free content.

Customer Reviews

Arash has spoken on Fox Chicago, CBS Chicago, Fox Business Channel, WGN Chicago; his works have been mentioned by Mayor Emanuel; And Arash has spoken at regional Economic Development Conferences on Innovation and Green Construction- in 2011 he became the Mayor of Chicago's 2012 Budget Ideas.com.

First 3 chapters are about how great the author is, how we have to all be aquaponics wizards to survive the future, and everything you don't need to know as a hobbyist on the rules and regulation of commercial selling your produce and fish. Full of typos and missing sentences, it seems the author was more interested in patting himself on the back (he even names a plumbing part after himself. It is also full of website links that take you to some very suspicious sites, and quite a few that

lead to nowhere....Save your money and buy any other book on this subject.....this one stinks

Trying to get started in Aquaponics, good book for beginners.

very good

Not what I expected based on description

book was wrote to make money only. the free downloads, web sites go no were and even bring you back here to buy.spend your money else were. (need refund)
