McGraw-Hill authors represent the leading experts in their fields and are dedicated to improving the lives, careers, and interests of readers worldwide

I now own two psychology textbooks. This text is perfect for high school students, which is something hard to find for this subject material. The other one I have is very detailed and would be more in line with college work. Don't get me wrong, this is hefty textbook. There are over 600 pages

with 21 chapters (my other one has almost 800 pages and 17 longer chapters). I like the charts in Understanding Psychology along with the colorful pics, assessments in each chapter, prudent use of comics, profiles of people in psychology, quick labs, summary and vocabulary, and use of white space for easy note taking. Understanding Psychology is great for its intended audience, high schoolers, home schoolers, or independent study.

Good basic overview of Psychology. I also bought teachers edition and find the pair very good for homeschooling. Easy to read helpful quizzes. If you are looking for good basic book, this is it.

LOVE the way this book starts out.....Going to be exciting to learn out of this book. My daughter has trouble comprehending what she reads but she is looking forward to this book. Its self explanatory!
