Web Design For Kids

Synopsis

The perfect introduction to basic coding concepts for children! In this one-of-a-kind book, basic coding concepts are introduced in a fun, easy-to-understand format. Kids will meet HTML, CSS, and JavaScript, three "characters" who each play an important role in making a web page. Flaps introduce a concept on the outside and have the definition underneath. This engaging narrative structure along with lift-the-flaps and vibrant illustrations are perfect for helping kids understand web design.

Lots of information in an easy to understand format. My 12 month old loves lifting the flaps! Would be better if it was in a story format.

It's a small, FLAP BOOK! Not at ALL what I expected, but my son seems to enjoy it. BUT A FLAP

BOOK?! REALLY?!

Lots of flaps to pull up. Very colorful. My 18 month old loves it.

My son has and loves the book *Web Colors*, which also has a multiple-flap format, so I thought this would be just as enjoyable. It's a cute book, but I have to dock it a couple of stars for the misspelling of "separated" as "seperated" under the Attributes flap on the fourth page (see pic). Where were the editors? I would think that a book that presents its content in a fun, non-traditional design would be edited thoroughly and wouldn't make it to press with any errors, especially when it's meant to be an educational book for children.

Great for budding geniuses...
