How To Build Treehouses, Huts And Forts

Synopsis

A treehouse is a wonderful idea, but how in the name of creation do you actually build one? In this delightfully illustrated handbook, David Stiles, the unofficial world grandmaster of the treehouse, shows how. Not assuming anything about the treehouse builder, Stiles starts with the basics: how to nail, how to buy wood, what kind of screws and nails to use. Then it's on to an A-frame design so simple that it can be built in a weekend out of four sheets of plywood, followed by lean-tos, a tree hut, and a Tarzan-style jungle hideaway. There are also forts of every description, including a 21-foot-tall lookout tower modeled on one George Washington built to keep an eye on the redcoats. Stiles also adds a design for a snowball catapult, an igloo and even a Nerf-loaded cannon. Written for children, with an adult peeking over their shoulder, Stiles's TREEHOUSES, HUTS, & FORTS is a dreamer's handbook, offering practical results.

Book Information

Paperback: 96 pages

Publisher: Lyons Press; 1st edition (November 1, 2003)

Customer Reviews

"How to hammer, how to saw, how to dream. The perfect guidebook for kids." - Wally Lawrnece, reader and weekend carpenter.

This book is filled with fun projects for kids and their parents to build in their backyards. It begins with a section on basic carpentry and continues with easy-to-follow, step-by-step instructions on building treehouses, forts and huts. It concludes with a section on "cool stuff for kids to make" such as treasure chests, cannons, catapults, and several fun projects to build in the snow.

Bought this book for a Christmas gift for a child that has a dream of building a tree house. Nice book and easy for him to understand and relate to for the age of 10-12

Very good book

My kids are desperate for a tree house or fort in the back yard. After pricing commercially available options, I decided that I could build one for a fraction of what a Play Nation solution would cost. So, I started looking for plans. I saw these Stiles publications (Treehouses and other Cool Stuff and Tree Houses, Huts and Forts.) at [Amazon.com](#), and thought they looked promising. Well, "promising" just about describes it. Their plan for Fort Bravo in this book fits the bill for my kids, and these come with material lists, but the detail - especially for building the roof - is simply inadequate. I've never built a house, so am unfamiliar with construction techniques for building a roof. Additional research will be required to build either fort.

We have used this book time and again! The illustrations are wonderful and the details are very workable. The plans are very interesting and full of great information and suggestions. I am genuinely thankful for this book!

Gave this to my husband as a Christmas gift. He has enjoyed reading through it and hopefully will start a project for our boys, ages 2, 4, and 6!

Great book with wonderful ideas.

Great Book!

Our son enjoyed this book years ago from the library, but he still requested his own copy for his birthday. He's read other similar books, but this is his favorite.
