Leaf Mold Composting: A Simple Way To Improve Houston Soils

Synopsis

Leaf Mold Composting - A Simple Way to Improve Houston SoilsBook Preview:Leaf Mold

Composting is a simple way to improve Houston soils. After my first year of gardening here in Texas, my grand experiment that failed big time, I filled my raised garden beds with leaf mold compost. My plants loved it! They outgrew the spacing I gave them and produced prolifically. We had an abundant harvest my second year of gardening here in Texas. You can buy leaf mold compost by the truckload at Nature's Way Resources (\$50.00/cubic yard) or bagged leaf mold compost for about \$10/bag either at their soil yard at a variety of local nurseries. You could also try Handcrafted Humus Compost from The Ground Up for \$49.00 / cubic yard or \$8/bag. If I lived close to their soil yard, I wouldn't hesitate to use their products. Both composts come from local landscapes. But, take my advice and borrow a truck if you need to. It's worth it to buy it by the truckload rather than by the bag. And BUY this book, if you want more! Customer Reviews

Like an earlier book I picked up at random on a free day from this author, this one is written specifically to address the soil needs in Houston Texas. Having said that, it is well written and the information is generally useful. Would I buy it at full book price? No. 4 pages does not make a book. But if you've picked it up at \$0.99 or are reading it on Kindle Unlimited, it is very useful information for gardeners.

Good information ,but very short. I would say this is more like an article in a magazine than a book of its own.
