Customer Reviews

Learn How to Quickly Solve Difficult CHPN Test Questions Here's a little "secret" about the Hospice and Palliative Nurse Certification Examination: the CHPN test is what we in the test preparation field call a "content driven" test. While some tests are looking to see what you are ABLE to learn, the purpose of the Certified Hospice and Palliative Nurse (CHPN) Examination, Certified Hospice and Palliative Licensed Nurse (CHPLN) Examination, and Certified Hospice and Palliative Nursing Assistant (CHPNA) Examination, offered by the National Board for Certification of Hospice and Palliative Nurses (NBCHPN), is to test your understanding of what you have already learned. The goal of the CHPN test is to use a standardized testing process to create an objective assessment of a test taker's knowledge and skills. In other words, it's more about what you know than your ability to solve clever puzzles. This is good news for those who are serious about being prepared, because it boils down to a very simple strategy: You can succeed on the CHPN test and become a Certified Hospice and Palliative Nurse (CHPN), Certified Hospice and Palliative Licensed Nurse (CHPLN), or Certified Hospice and Palliative Nursing Assistant (CHPNA) by learning critical concepts on the test so that you are prepared for as many questions as possible. Repetition and thorough preparation is a process that rewards those who are serious about being prepared, which means that succeeding on the CHPN test is within the reach of virtually anyone interested in learning the material. This is great news! It means that if you've been worried about your upcoming CHPN test, you can rest easy IF you have a good strategy for knowing what to study and how to effectively use repetition to your advantage. But it also creates another set of problems. If you tried to memorize every single possible

thing you can for the CHPN test, the field of possible things to review would be so huge that you could not hope to cover everything in a reasonable time. That's why we created the CHPN Exam Flashcard Study System: we have taken all of the possible topics and reduced them down to the hundreds of concepts you must know and provided an easy-to-use learning method to guarantee success on the CHPN test. We wanted this system to be simple, effective, and fast so that you can succeed on your CHPN test with a minimum amount of time spent preparing for it. --Here Are Some of the Features of Our CHPN Exam Flashcard Study System

Study after study has shown that repetition is the most effective form of learning- and nothing beats flashcards when it comes to making repetitive learning fun and fast. Flashcards engage more of your senses in the learning process- you "compete" with yourself to see if you know the answers to the questions, and the flipping action gets you actively involved in the learning process. Our cards are printed on heavy, bright white 67 lb. cover stock, and are laser printed at 1200 dpi on our industrial printers- these are professional-quality cards that will not smear or wear out with heavy usage. We cover the major content areas on the exam. Our flashcards include an edge that is micro-perforated, which means that you are much less likely to have a painful papercut on your fingers when moving quickly through the cards. Our cards are portable, making it easy for you to grab a few and study while waiting for the bus or the doctor, or anywhere where you have a spare moment that would otherwise be wasted. Our CHPN test cards are written in an easy to understand, straightforward style - we don't include any more technical jargon than what you need to pass the test. The cards are a generous size- 3.67 x 4.25 inches- they fit perfectly in your hands and they aren't so small that you have to use a magnifying glass to read tiny type- all questions and answers are in a normal-size print for easy studying. Our cards include in-depth explanations- you won't see any "one word" answers on our cards that require you to go get a textbook to understand why your answer was wrong- all of our cards include generous, thorough explanations so you not only get it right or wrong- but you also know why! We use a font created by Microsoft to make reading easier- this will enable you to absorb more information painlessly during late night study sessions. Our system enables you to study in small, digestible bits of information- unlike using boring textbooks, flashcards turn learning into a "game" you can play until you've mastered the material. It's easy for a friend to help you study- they don't even have to know anything about the CHPN test- if they can read, then they can quiz you with our flashcards!

Now, let us explain what the CHPN Exam Flashcard Study System is not. It is not a comprehensive review of your education, as there's no way we could fit that onto a single set of flashcards. Don't get us wrong: we're not saying that memorization alone will automatically result in a passing CHPN test score- you have to have the ability to apply it as well. However, without the

foundation of the core concepts, you cannot possibly hope to apply the information. After all, you can't apply what you don't know. CHPN Exam Flashcard Study System is a compilation of the hundreds of critical concepts you must understand to pass the CHPN test. Nothing more, nothing less. --If you think there's even the smallest chance that these flashcards will help you, you owe it to yourself to try them out. Don't let fear or doubt stand in the way of your opportunity to achieve the test score you need to fulfill your dreams.

I purposely waited until I had taken my exam to review this product . I did pass my certification test and I believe these cards were helpful. I would suggest these cards as an addition to the NHPCO study guide which I found to be the best way for me to study .these cards have condensed facts and information which I reviewed when I was short on time , good to keep in the car or carry with you etc . I would recommend these cards as a good addition for studying but definitely not the only way to study in my opinion.

I like the way the information is compacted into smaller context of information. The Flashcards are small enough to put in your purse so you can study them whenever you have down time. I like the explanation of answers to the questions .

The cards seem to cover all topics and are very thorough in explaining the answers. Also I am finding the explanation of the "Leitner Method" very helpful as I begin studying. Having never been a very good test taker (or organized student) any bit of information helps!

I just received the flashcards though , which appear to show a large amount of valuable and pertinent information. I've only begun to glance over them but I can tell they will be a huge support for improving my test score. I can't wait to start preparing for this important exam to further my career.

I am a tactile learner. Having a card on my hand is very helpful. I retain more this way than I do reading from a book.

Received as ordered. While the information on these is relevant and good, I found them too wordy for purpose of study for exam. I went through them all prior to the exam but felt like I got a better foundation from an exam study guide.

I LIKE THIS BETTER THAN THE BOOKS, EASY TO USE AS A STUDY MATERIAL. VERY HANDY THAT I CAN BRING IT ANYWHERE.

I was raised on the flashcard system. It was used for reading, english, math, and music. I am used to a question on one side of the card and an answer on the other, with both the question being short and the answer usually being only a word or two. These flashcards are much different, they ask you to explain an ideas, or priniciples surrounding the topic, in which the answer is quite long and detailed. I understand that this method really tests whether you have true knowledge of the topic or if you are simply memorizing rote answers to easy questions. Now that I have shared that with you, let me say that the system really works. I used the same system for the oncology certification nurse exam and passed the exam the first time around. The questions on these cards challenge you to really comprehend the priniciples of a given topic. If you can verbalize an understanding of the whole topic, then it doesn't matter how the question is worded on the exam, you will be able to recognize the answer. This product is well worth the money and I am hoping it will help me succeed with the CHPN test like it did the OCN test.
