Mario F. Triola is a Professor Emeritus of Mathematics at Dutchess Community College, where he has taught statistics for over 30 years. Marty is the author of Essentials of Statistics, Elementary Statistics Using Excel, Elementary Statistics Using the Graphing Calculator, and he is a co-author of Biostatistics for the Biological and Health Sciences, Statistical Reasoning for Everyday Life and Business Statistics. He has written several manuals and workbooks for technology supporting statistics education. Outside of the classroom, Marty has been a speaker at many conferences and colleges. His consulting work includes the design of casino slot machines and fishing rods, and he has worked with attorneys in determining probabilities in paternity lawsuits, identifying salary inequities based on gender, analyzing disputed election results, analyzing medical data, and analyzing medical school surveys. Marty has testified as an expert witness in New York State

Supreme Court. The Text and Academic Authors Association has awarded Mario F. Triola a "Texty" for Excellence for his work on Elementary Statistics.

I took Elementary Statistics in college. The professor was so disorganized and vague that I was absolutely saved by his selection of this book. Sitting down and reading this material made me understand the subject like no other math book has ever before. Recieved an A in the course and a recommendation to continue in mathematics by the same professors. Too bad my major is in Psychology. Maybe I'll be considering a minor in Statistics!

In great condition. Just what I needed for intro to statistics. The text is definitely better than the other one used in 2015. It breaks things down for a better way to learn.

Access card was useless. Don't rent with expectation of using it.

Some of the pages in chapters 1-2 are off (it cuts out the initial parts regarding frequency distribution tables, polygons, ogives, and histograms which is 20+ pages worth of learning material--i used my school's library version to catch up) if you are looking for the exact same version of the other 12th edition (the one with the kites on the cover), but the content and homework is the practically the same (again, pages are a little different than the other book), and the answers are in between chapters instead of the back of the book, which is quite convenient.

Book came in plastic wrap. Contained a new unused Stat Lab code. I like the book so far it's interesting it really gets your mind thinking.

I love this statistics textbook! It really lays out the foundation of what statistics is and how to calculate certain statistical formulas. My professor is amazing at teaching this, and it goes without saying that you need a good professor to teach the subject. Highly recommended!

MORE LIKE ZERO STARS!!! ACCESS CODE DOES NOT WORK. This is suppose to be a NEW book. Thats the only reason I purchased this NEW book because it came with a NEW access code. I called Pearson Support and said this code has been USED already!! I ended up spending an additional \$110.95 for the new access code. Im so pissed!**PLEASE DO NOT WASTE YOUR MONEY FROM THESE GUYS!!!!**

Good quality for a rental book. Even had the CD! I must admit I don't know what the point of the CD is since it's literally just electronic pages of the book that weren't printed and bound into the book for some reason. I want to know why those pages aren't just a normal part of the book. It's really bothering me.
