Customer Reviews

Tenth Edition - piano for adults - book one.

I purchased this book cheaper on than my school had it for. It looks great. It does appear to be more intermediate than easy, compared to my beginners piano books from when I was a child. Maybe as a child the beginners books are easier than adult beginners.

A good intro book for pianists, this is good if you already have some basic knowledge of how to read music and the general layout of the piano because although it starts with the basics, it does move quite quickly

There are some typos here and there but it's a great book.

I got what I wanted, it came on time.

Shipped quick and the price was right.
