Cacti And Succulents: A Complete Guide To Species, Cultivation And Care

Synopsis

Readers will learn about more than 50 species of cacti and more than 10 families of succulents, including their ideal locations, natural habitats, and care and feeding needs, in this complete guide to these captivating plants. Beautiful specimen plants from six garden collections the world over, from Zurich to Phoenix, are detailed in full. Complete descriptions, including color photographs, will help readers identify their plants, and detailed care instructions will help them make sure that their plants thrive, whether they are being grown indoors or outside, in the city or in the country.

Customer Reviews

Gideon F. Smith is a past president of the International Organization for Succulent Plant Study, chairman of the World Flora Project, and holds positions on the steering committees of many international botanical initiatives. He has published more than 500 scientific and popular papers on the taxonomy, biology, and evolution of succulent plants, and has won numerous awards for his work with succulents.

A wonderful and very beautiful ly illustrated book

I have a lot of cacti in small pots and was looking for their names and special caring tips and the book does not has it

I really liked this book. Lot's of great ideas. I refer to it quite often

I gave this to my Mom for a gift as she loves succulents. She also loves the book as it is chock full of photos, tips and info. Highly recommended!
