# Small Animal Cardiopulmonary Medicine: Self-Assessment Color Review (Veterinary Self-Assessment Color Review Series)

## Synopsis

Dr. Wendy Ware, author of the highly acclaimed *Cardiovascular Disease in Small Animal Medicine*, has brought together specialist contributors to produce this important addition to the *Self-Assessment Color Review* series. The book presents a wide variety of cases involving cardiothoracic diseases, mainly focusing on the causes of respiratory distress and other clinical signs that relate to lower respiratory, cardiac or other intrathoracic disorders. Many cases in the book involve common diseases and focus on diagnosis and management, but some more unusual and challenging cases are also featured. The 218 cases comprising questions, illustrations and detailed explanatory answers appear randomly to reflect real life practice, and are designed not only to test the ability of the reader but also to educate and inform. This book is of value to all veterinary practitioners with an interest in canine and feline cardiothoracic diseases who wish to reinforce their clinical skills, to those veterinarians and veterinary nurses/technicians preparing for higher qualifications and to veterinary students as an aid to learning and revision.

## Book Information

Series: *Veterinary Self-Assessment Color Review Series*

Paperback: 288 pages

Publisher: CRC Press; 1 edition (March 17, 2012)

Language: English

ISBN-10: 1840761644

Product Dimensions: 0.5 x 6 x 8.5 inches

Shipping Weight: 1.2 pounds (View shipping rates and policies)

Average Customer Review: 4.7 out of 5 stars 4 customer reviews

Best Sellers Rank: #1,306,805 in Books (See Top 100 in Books) #80 in [Books > Textbooks > Medicine & Health Sciences > Veterinary Medicine > Food Animal](#) #164 in [Books > Medical Books > Veterinary Medicine > Bovine Medicine](#) #176 in [Books > Medical Books > Veterinary Medicine > Food Animals](#)

## Customer Reviews

...clear concise answers all about canine and feline respiratory cases...such an easy format that it can be read in the practice or by the holiday pool.â•John Sauvage, *Veterinary Practice*, September 2012...a wonderful tool to help clarify your knowledge in cardiopulmonary disease. Nothing works better than real life situations to master such a complex subject...A nice (and affordable) way to

refresh your knowledge in cardiopulmonary conditions • Tomorrow's Vets, January 2013...comprehensive coverage of cardiorespiratory conditions...well illustrated with clinical and surgical images, electrocardiograms, radiographs (including angiograms), CT scans, echocardiographic and endoscopic images, as well as cytological samples...a useful reference text...I found particularly useful the listed further reading...particularly useful for veterinary students in the clinical years of the course and for students studying for postgraduate qualifications...can be picked up to review cases if there are a few quiet moments during the day...I found the book to be addictive...useful for anyone in practice who is keen to get up to date with small animal cardiopulmonary medicine in their own time, in a relaxed and informal way and at a very reasonable price. • Malcolm A. Cobb, Veterinary Record, February 2013...an easy read...images are excellent quality and the answers are thorough...an excellent addition to the veterinary student's library and would benefit general practitioners as well. The case-based format makes it very easy to read. It is a nice supplement to textbooks, since it combines pathophysiology with actual cases. • Maureen McMichael, DVM, DACVECC, Doody's Review Service, March 2013

This addition to the practical series of Manson Publishing is a wonderful tool to help clarify your knowledge of cardiopulmonary disease. -- Tomorrow's Vets I found the book to be addictive; once I had been through a case, I was keen to see what was next! The nature of the book does mean it would be useful for anyone in practice who is keen to get up to date with small animal cardiopulmonary medicine in their own time, in a relaxed and informal way and at a very reasonable price. • Veterinary Record The book presents a wide variety of cases involving cardiothoracic diseases, mainly focusing on the causes of respiratory distress and other clinical signs that relate to lower respiratory, cardiac or other intrathoracic disorders. Many cases in the book involve common diseases and focus on diagnosis and management, but some more unusual and challenging cases are also featured. The 218 cases -- comprising questions, illustrations and detailed explanatory answers -- appear randomly to reflect real life practice, and are designed not only to test the ability of the reader but also to educate and inform. This Self-Assessment Color Review is of value to all veterinary practitioners with an interest in canine and feline cardiothoracic diseases who wish to reinforce their clinical skills, to those veterinarians and veterinary nurses/technicians preparing for higher qualifications and to veterinary students as an aid to learning and revision.

I have a cat who is ill with cardiomyopathy and who has survived years beyond expectations. I became interested in veterinary medicine and this book presents a student or vet with color

photographs, a description of the presenting case and pertinent questions. Turn the page and find the answers. An invaluable resource.

I have glanced over a couple of cases, but I still haven't had time to sit down and give this book its due attention. Looks very promising though, with the pictures relating to the diagnostics or clinical presentation of the cases.

Terrific !

This collection is a great idea, because you check what you know and what you DON'T KNOW. I highly recommend it.
