# Cancer Salves: A Botanical Approach To Treatment

## Synopsis

In the time when botanical pastes were popular, the success rate for cancer treatment was about 75-80%. In this fascinating book, the author demystifies the historic formulae and uses and provides honest insights into the pros and cons of one of the most reliable natural cancer treatments of past eras. She provides case histories and clear instructions that a highly motivated and careful individual can use clinically or in self-treatment. --This text refers to an out of print or unavailable edition of this title.

## Customer Reviews

Review by Irene Alleger October, 1999 Cancer Salves is an extraordinary book; one of the most hopeful for the cancer patient, that I have read. I think if I were diagnosed with cancer tomorrow, one of the first things I would do is call for a consultation with this cancer counselor. --Townsend Letter for Doctors and Patients: The Revival of a Botanical Treatment for Cancer  
Dr Ingrid Naiman's book, Cancer Salves, is the best work I've ever been honored to review. The book is simply beautiful, in presentation, scholarliness, and integrity. Dr Naiman has been awarded not one, but two honorary PhDs for her work. The book is a testament to that work. Cancer Salves is at once, a reference book, an historical narrative, and a guide to those whose options seem limited. A cancer diagnosis is a horrible scare, for most people. One's life is suddenly upside down and inside out, and even if the outcome is successful, life is never again the same. --Wellness Directory of Minnesota  
Ingrid Naiman has done the world a service in researching and writing her book, Cancer

Salves. Most books on unconventional cancer treatments are partisan in one way or another. Dr. Naiman's approach is temperate, scholarly, and wise. All patients considering the use of cancer salves, pastes, and poultices or related products should first read this book. --Ralph W. Moss, Ph.D.

Ingrid Naiman received a B.A. in Asian Studies from the East-West Center at the University of Hawaii in 1962 and an M.A. in Development Economics from Yale University in 1964. She worked in the late sixties for the Department of State in Vietnam and India before returning to her first loves, mysticism and meaning. She has made a lifelong study of ancient Greek, Tibetan, and Ayurvedic medicine and has received two honorary doctorates for her work in holistic medicine. --This text refers to an out of print or unavailable edition of this title.

Wow, I am profoundly impressed and pleased at the work that went into this book. It's a preservation of wisdom and knowledge that otherwise would be lost, at least in part. It's written with both a personal and a clinical tone. An excellent resource to have on hand.

I read this book very carefully and with great interest in the material. It's an amazing source for anyone who wants to use botanical salves and avoid surgery. Naiman writes extremely well with tentative opinions that sensitively consider the complexity of her subject. She has a website and sells products described in the book.

When I heard of a woman who had pancreatic cancer and who had been sent home to die, but had managed to save herself with these salves (self-administered under the guidance of a Naturopath), I was incredulous. I was told she actually had the growths in jars and was always happy to share her story with others who might benefit. I made a point of meeting the woman and found her the picture of health, running a vibrant business, working harder than any of the men under her employ. She showed me the jars containing some evil-looking growths. She showed me an unusual scar where the cancer had exited her side. She told me how much it had hurt and how hard it was to kick the morphine they had her on in the hospital. And she told me of other "terminals" who had survived. I got to know this woman well and I trust her implicitly. When I got the book "Cancer Salves" and showed it to her, she was ecstatic. Somebody had finally gotten it in print! How brave! The value of the internet is that you have access to information that would otherwise be banned. With the bad (pornography, etc.) comes the good - voices long silenced by the heavy hand of institutional

authority - facts about effective cancer cures that have saved many lives. Search the web for the life history of Royal Raymond Rife. Get the video "Hoxsey - The Quack(?) Who Cured Cancer" (Also renamed "Hoxsey - How Healing Becomes A Crime"). Make up your own mind, however incredible it all may sound at first. And get this book while you still can! Many less-threatening items have been banned by the AMA/FDA. If one out of every four people in America will get cancer, this may save you or someone you love. Knowledge is power.

Very well written book and easy to understand. It definitely helped me to treat my skin cancer without having to undergo surgery a second time. I would recommend this book to those interested in drawing out and killing all the cancer in a specific area without a big medical bill.

This unique book gives specific recipes for topical salves that kill cancer cells. I have used these salves and speak from personal experience in killing cancer.

It's very informative and every potential cancer sufferer (all of us) need this information!

This absolutely riveting book is unfortunately out of print and I was delighted to find it used here on . The copy I received is in almost new condition. I am avidly reading this history of healing salves for cancer, and carefully studying the many different practical recipes for novice herbalists to try out which are provided in this book.

Cancer salves are so much more readily available than a few years ago, and certainly being used a lot more. Book is invaluable for someone needing that knowledge.
