Smell (Five Senses Series)

Synopsis

Do you remember your first realization of any of your five senses? Prolific children's author J. M. Parramón successfully tackles these tough concepts in words that 3-5 year olds can comprehend. These five colorful books awaken young minds to the wonders of the senses: the taste of oranges, the aroma of fresh-baked bread, and other sensations that give us delight in being alive. Educational, yet fun to read, this clever series is clearly written and cheerfully illustrated in flowing colors throughout. Each book includes a special "scientific" section to help parents answer their children's questions about the senses.

Book Information

Series: Five Senses Series

Paperback: 32 pages

Publisher: Barron's Educational Series (April 30, 1985)

Language: English

ISBN-10: 0812035658

Customer Reviews

Text: English, Spanish (translation)

Maria Rius is the illustrator of "Los tres cerditos" from the same series. Maria Rius is the illustrator of "Los tres cerditos" from the same series.

I used this series of books with a daycare class. The kids loved them. The pictures are engaging, and the text is a fun way to introduce children to the senses. Each book contains further pictures

and explanations about the mechanics of the body, i.e. the nose, ears, tongue, which are great for children who are still curious when the book is done.

A fun and entertaining way to discuss the sense of smell with a classroom full of preschoolers, will be used yearly.

I bought these books as a teaching tool for my five senses unit. I have not used them yet but they are written in a way young students could understand.

arrived just as stated!

This is one book in a series of five books geared to teach children from preschool age through the first or second grade of the workings and importance of our five senses. This is a short (approximately 38 pages) scientific explanation of our sense of smell. It includes a very nice diagram of the nose and text suitable for the adult teacher to further the discussion as presented in the book. This diagram is detailed, but not so detailed that it will give the adult reader unfamiliar with anatomy any problems. The text consists of one sentence per page addressing the various ways the sense of smell is used; to smell flowers, the cake, fresh from the oven, the smell of cows in a barn, Mommy's perfume, the smell of wood burning in a campfire and so on. Each example is accompanied by a wonderful illustration in watercolor which is quite detailed. The children, adults and background detailed in these paintings have almost a timeless quality; a European flavor...probably Italian. Each work of art presented here is quite pleasing to the eye and works perfectly with the text. This is an ideal book for the parent or teacher to use in leading a discussion on the sense of smell. There is not one page in this work that the instructor will not be able to get a lot of mileage from. This work was first published in 1983 and is still as useful today as it was when it came off the press. Highly recommend this one and the rest of the books in this set...they are great teaching aids, fun to read, and the children love them. Don Blankenship The Ozarks
