Age Range: 6 - 8 years

Grade Level: 1 - 3

Customer Reviews

Jennifer Dussling lives in Highland Park, NY.

Amazing book for the 5.5- 9yr old geologist

Fun book for my kid. Great photos.

My daughter loves this book. It's very basic compared to the more adult reading level type of rock and mineral books but really great for kids. Lots of very basic information to get a young reader interested in rocks. Would buy again. Shipping was immediate and received in 2 days (shipped to rural Michigan). Packaging was appropriate. Recommend for any young reader. 4 star only because it is super basic but the pictures are wonderful and vibrant.

This is a great little book. It presents information about rocks for children in a accessible and fun way as well as encourages them to go out and explore the world in a structured scientific way. And plus, what kid doesn't love stickers!! I would recommend this book for children around the age of 10.

Got this for my 8 yr old grandsons birthday along with a rock kit and he love it.

Decent little book. It has a good amount of rocks in it for the cost of purchase.

The book concept is good. The child places the rock sticker on a page describing that rock. However, the stickers and the pages to not always match. There is a fool's gold page, but no sticker. My 4 year old still likes this book, but gets frustrated because a few don't match up. The amount of text on each page is good for 4-7 year olds.

Bought this as a gift for my granddaughter for her stocking...shes loves to collect pretty rocks ..wasnt sure if shed like it but when she saw it she had a big smile..it really it a good book for a child...simple and interesting
