# Chicago Birds: A Folding Pocket Guide To Familiar Species In Northeastern Illinois (A Pocket Naturalist Guide)

## Synopsis

The Windy City isn't just a hub for commercial airlines: over 8 million birds migrate through town each autumn and spring. This beautifully illustrated guide highlights over 140 familiar and unique species and includes an ecoregion map featuring prominent bird-viewing areas. Laminated for durability, this lightweight, pocket-sized folding guide is an excellent source of portable information and ideal for field use by visitors and residents alike. Made in USA.

Grade Level: 5 and up

## Customer Reviews

Chicago Birds, An Introduction to Familiar Species in Northeastern Illinois, is a must-have, reference guide for beginners and experts alike. Whether you're on a nature hike or in your own backyard, you'll want to take along a copy of this indispensable guide. The Pocket Naturalist(tm) series is an introduction to common plants and animals and natural phenomena. Each pocket-sized, folding guide highlights up to 150 species and most feature a map highlighting prominent sanctuaries and outstanding natural attractions. Each is laminated for durability. (31/2 X 81/4 folded, opens to 22 X 81/4, color illustrations, map)

Zoologist Jim Kavanagh has made a career out of introducing novices to plants, animals, the

sciences and world cultures. In addition to creating over 500 simplified nature guides, he has also authored guides to languages, cities and outdoor skills. An avid traveler and backpacker, Kavanagh's path has taken him around the world to many remote destinations including the upper , Africa, Australia, and the Arctic Circle (and this is just the As). He is also the author of a series of state-specific guides to common species and natural attractions and a children's book on evolution.

Small & great read for the backyard!

Perfect for our kids to use!

This is a very colorful, informative booklet. It is a gift for someone who has discovered bird watching, and she is thrilled with it.

EXCELLENT.

Thanks..I now know which birds I am feeding..very interesting..

These Pocket Naturalist field cards are a great help in identification of birds; however, they have a significant drawback: there is usually only one illustration provided for each species and its the male. In many species, the male and female are fairly different, so if you happen to be looking at a female Goldfinch, you will likely not be able to identify it as such because the Guide only shows the male (he's bright yellow, she's dullish yellow-green and much more nondescript).I like the Pocket Naturalist for its small size and very little weight. Perfect for tucking in my knapsack while hiking or boating. HOWEVER, instead of purchasing the Pocket Naturalist guide, I would recommend that you check out the Peterson's FlashGuides series. Peterson's provides male and female illustrations and makes identification much easier with greater liklihood of success. There are several different versions of the FlashGuides for birds based on region, just like these Pocket Naturalist guides. Peterson's costs a little more, weighs a little more and folds out larger than the Pocket Naturalist (a drawback as its kind of hard to handle in the wind), but it is the better of the two products.
