I Ching And The Genetic Code: The Hidden Key To Life

Synopsis

The universal claims of both the "I Ching", "the book of changes", the compendium of Chinese natural knowledge and the genetic code, "the book of life", encouraged Dr. Schonberger to establish the hypothesis of a general system in nature. He has verified in numerous parallels the congruence of both the I Ching code and the genetic code. The sensational results are detailed for the first time in this book. The "I Ching and the Genetic Code" is an important and exciting link between science and spirituality!

Book Information

Series: Hidden Key to Life

Paperback: 160 pages

Publisher: Aurora Press (November 1, 1992)

Language: English

ISBN-10: 094335837X

ISBN-13: 978-0943358376

Product Dimensions: 8.3 x 5.4 x 0.4 inches

Shipping Weight: 8 ounces (View shipping rates and policies)

Average Customer Review: 4.3 out of 5 stars 10 customer reviews

Customer Reviews

Text: English, German (translation) --This text refers to an alternate Paperback edition.

There seem to be three books on the subject of the correspondence between the genetic code and the I Ching: Schonberger's, "DNA and the I Ching: The Tao of Life" by Johnson Yan ASIN:1556430973, and Katya Walter's "Tao of Chaos: DNA and the I Ching". Schonberger's book is showing its age. It was first published in the early 1970's (and no, it wasn't Schonberger who first noticed the link between the genetic code and the I Ching; it was Carl Jung's disciple, Marie-Louise von Franz who first wrote about it in the 1960's) and there has been considerable evolution of thought since the publication of this title. Of the three, Katya Walter's shows the most insight to this link. (Interestingly, von Franz, Schonberger and Walter all identify themselves as Jungians. Yan

comes from a syncretic traditional Chinese/modern scientific point of view.) Unfortunately, Walter's book is out of print, though it is still available used on . By all means read this book, but if you find yourself feeling at the end, "But isn't there more?", read Walter's "Tao of Chaos".

The double helixed DNA is a code that links many realities and traditions together. In this book the link to the ancient oracle called the I Ching is minutely examined and insights become truths humanity had forgotten. The Hermetic Code is multidimensional and the inherent connection between the DNA and the I Ching is one of the threads this book examines.

Together with Gene Keys I found this material to most enlightening for those interested in the transformation possibilities hidden within the human being

Content is amazing

This is a unique somewhat pioneering work for humanity's greater understanding. It supports the modern day idea that the ancient I Ching wisdom can be correlated to our genetic code. This idea is very well mapped out in the Human Design System and is further supported in Gene Keys and thereby shared among a growing number of individuals.

This book might be called the spiritual genetics. It compares the I-Ching to the DNA code and how this can be used to make our choices and what is the chemistry of how these choices are available to us. It is literally the science of the beginning and end of everything. It shows how our DNA is just like the I-Ching. I would not want to be without this book.

The idea that there is an identity between ancient wisdom and modern science is something that is being validated here.

One of the most beautiful ways to relate old fashioned knowledge to "modern" science. When you summarize it all the only conclusion is that ancient people knew everything that scientist pretend to find out and God's creation has been described from old times...I found it amazing, thrilling, exciting, scientific, beautiful.
