# Spiders

## Synopsis

The physical characteristics, behavior and habitats of different kinds.

## Book Information

Lexile Measure: 580 (What's this?)

Paperback: 32 pages

Publisher: Holiday House (January 1, 1993)

Language: English

ISBN-10: 0823410811

ISBN-13: 978-0823410811

Product Dimensions: 8.2 x 0.1 x 8.2 inches

Shipping Weight: 4 ounces (View shipping rates and policies)

Average Customer Review: 4.7 out of 5 stars 33 customer reviews

Best Sellers Rank: #18,245 in Books (See Top 100 in Books) #7 in Books > Children's Books > Education & Reference > Science Studies > Biology #12 in Books > Children's Books > Education & Reference > Science Studies > Environment & Ecology #29 in Books > Children's Books > Growing Up & Facts of Life > Health > Diseases

Age Range: 5 - 8 years

Grade Level: Kindergarten - 3

## Customer Reviews

PreSchool-Grade 2-Gail Gibbons is well-known for her succinct, colorful treatment of numerous nonfiction topics. *Spiders* (Holiday House, 1993) is narrated by Suzanne Toren, whose mature, expressive voice carefully explains the page-turn signal (on one side) and that first the words at the bottom of the page will be read and then the words on the upper "picture" section of the page. Often the words on the pictures are labels, followed by the phonetic pronunciations, which are read more slowly and emphatically. Young readers will find the reading of the labels helpful, though nonreaders may be confused about just which item is which. Listeners are advised that most spiders don't hurt people, but youngsters may not have enough description of the black widow, which "can kill people," to prevent them from being frightened by any small black spider. Though not Gibbons' best work, her bright illustrations and simple text, pleasantly presented in read-along form, should be welcomed by budding entomologists. Fritz Mitnick, Shaler North Hills Library, Glenshaw, PA

An excellent science book by a frequent author. Within the triple borders of black and vividly colored lines framing each page, Gibbons uses deep green and blue backgrounds to set off transparent webs and drab spiders to fine advantage. In a succinct, informative text, she describes some of the 30,000 species of spiders, meanwhile illustrating assorted webs: sheet, tangled, funnel, triangle, and orb. Especially useful are carefully labeled side-by-side drawings of a spider's body and an insect's. A final page offers more odd facts--"Little Miss Muffet" was probably recoiling from a meal of mashed spiders, ``a common cold remedy, about 200 years ago." Visually appealing, solid information. As with all of Gail Gibbons' books, I am highly satisfied. I use this book in my first grade classroom during our spiders unit. Lots of good factual information and illustrations.

colorful, clear pictures . Our three year old grandson liked it and learned a lot from it. The seven year old was also interested.

My 4 year old grandson loved it!

Shipper bent the book when they packed it otherwise the book is great and just what I needed.

My second graders loved the book. Gail Gibbons knows how to write and illustrate and keep the kids interested. We used this book to relate our own spiders.

My wife bought it for her kindergarten class. According to her, it has the correct information to go along with her lessons.

Not as interesting to my 7 & 8 year olds as the gorilla one. Normally anything by Gail Gibbons is great.

Perfect as a part of my classroom reading program.
