# Prepper Essentials: Prepper Essentials What Every Survivalist Needs To Know When Building The Ultimate SHTF Stockpile (Survival Handbook, DIY, Emergency ... Essentials Books, Emergency Prepared)

## Synopsis

Prepper Essentials  
WHAT WOULD YOU DO IN AN EMERGENCY SITUATION IF A DISASTER STRUCK?  
The fact is, not many people are prepared for survival if a disaster struck. We often see natural disasters in the news and there is always a time delay between the occurrence and help arriving; quite often that timescale is the difference between living or dying. Therefore, being able to sustain yourself, your family and pets is something we should consider and take action in order to increase the chances of survival. This book "Prepper Essentials," by author, Jim Jackson, is the complete toolkit for your needs. The chapters clearly lay out how to manage your water and food needs, how to create a first-aid kit and finally how to handle pets, at a time when they will be confused and stressed too. As the old saying goes, "By failing to prepare, you are preparing to fail" Benjamin Franklin. This book helps with that preparation and is a must-read for those interested in stockpiling and survival in general.

## Customer Reviews

I thought this book was a good, quick read. I did feel it was far too generalized for the average new prepper. But for the complete newbie to prepping, it's a good first read.

Most natural and un-natural disaster occur at any time without warning. Some of the basic and necessary equipment and supplies to successfully survive a disaster are fire starts, lights, tools, beverages, food storage, water storage, shelter and clothing. All of the information required to to live past a small or large disaster is covered in much detail in this short read. Some locations are more prone to disaster than others. If you are in any way shape or form interested in disaster survivals, this read is for you.

Awesome book on prepping. The breakdown of the chapters are relevant and are also very informative to anyone in any stage of there prepping plan. The chapters on food in water where the

ones I liked to most. Detailed on what kind of food is best for long term storage and the amount of water you need to survive. Things are getting scary in the world. We should be prepared!

This is a good guide on how to be prepared for emergencies and natural calamities. It gives in detail what you need to consider when preparing for disasters. I learned what the essentials are - first aid kit, medicines, non perishable goods, etc. it is very important to be prepared and this book not only teaches you that but also on how to be resourceful when this type of situations come.

I found a few good tips, I just thought this was a bit too extreme

good

Excellent!

I am just starting my prepping and looking for books to help me plan. Jim Jackson gave me great tips and a place to start. Food, water, housing, first aid.
