Customer Reviews

With more than 30,000 certified professionals world-wide, the American Council on Exercise (ACE) is a leader in the fitness industry, offering certifications for personal trainers, group fitness instructors, and lifestyle and weight management consultants. The organization strives "to enable all segments of society to enjoy the benefits of physical activity" through continuing education for professionals and through practical resources such as Exercise for Older Adults. --This text refers to an out of print or unavailable edition of this title.

Great book. I used it for my Older Adults course in college and it's so informative. Has great exercises and guidelines for older adults which are doable.

As a required reading for an introductory university level athletic training class, this textbook provides a good foundation for working with older adults. It discusses the physiological changes that

occur with age along with common health challenges that must be addressed when working with older adults during exercise programs. A nice feature of the book are the pictures which demonstrate the exercise techniques for stretching, aerobics, and strengthening.

"Exercise has many health benefits for older adults." "Older adults may require more time to recover from exercise." "There, now you don't have to buy the book. There is slightly more detail in the book than in this review, but not enough to justify purchasing it.

Item is as expected...thanks

Item was just like promised.

I bought this book because I am a physical therapist that needed more ideas on treating older adults. I found the book to have all the same information I learned in undergrad and nothing new that I could use. If you have gone to school for PT or exercise science I would not recommend this book because it is all review.
