Put the same book back at big box store and ordered right then and there to save \$. Plus my 8 year old loved receiving a package from addressed to him. A fan favorite NG book we will definitely buy every year!

I love this book. My children love this book, too. That's why I bought a new version each year. This

year I placed the newest version in the goodie bags for my son's birthday party. Most of the children couldn't wait; they started reading right away. Some parents later told me that this book was the best goodie their children ever had.

Yes, kids will enjoy it, but so will adults. An example: Do you know that the earth travels around the sun at a speed that's 100 times that of a jet plane? There's interesting information for people that have a sense of curiosity.
